

JEE MAIN · CLASSES 10-12 · ZERO SETUP, BROWSER-BASED

# Honest assessment infrastructure for your JEE aspirants — zero setup.

Your results are your reputation — but between teaching hours and batch sizes, per-student diagnostic data is the thing no one has time to build. EduPeak gives your teachers an honest, ready-made assessment layer: students sign up free in a browser, and every test ends in a report your staff (and their parents) can actually read.

## The mountain, in numbers

**14 lakh+**

aspirants sit JEE Main each year (Jan + Apr)

**≈60,000**

NIT · IIIT · GFTI seats, decided by rank

**Top 2.5 lakh**

qualify for JEE Advanced

**≈17,000**

IIT seats at the summit

Indicative figures based on recent NTA / JoSAA cycles.

## HOW INSTITUTES USE THE THREE STAGES

### **BASE CAMP**

#### Map every incoming batch

Run the 97-minute readiness diagnostic on students entering Class 11. Each gets a CAMP profile — so you plan foundation work from data, not guesswork.

### **THE CLIMB**

#### Test as you teach

A fresh, dynamically-assembled test for every Class 11 & 12 PCM chapter — no repeated papers, no circulating answer keys. Per-chapter bands show who needs what.

### **SUMMIT PUSH**

#### Mock season, ready-made

A library of around 100 full-length NTA-pattern papers under the real clock — the test-series infrastructure you don't have to build, print, or invigilate-mark.

## Why it fits your institution

### ✓ **Nothing to install, nothing to maintain**

Browser-based on any device. Students sign up themselves — free to start during launch.

### ✓ **Papers that can't leak**

Chapter tests are assembled fresh from the question pool for every attempt — memorising a paper is impossible.

### ✓ **Credible parent conversations**

Printable reports with one fixed band model (70 / 45) — the same honest yardstick at every PTM.

## What a report gives your teachers

Per-student: marks, band, difficulty-tier accuracy, time use, and the exact chapters flagged "fix first". Across mocks: a score trend per student. Students can print or share reports with faculty — review takes minutes, not evenings.

**No invented percentiles · no rank theatre · real numbers only**

## PILOT IT IN THREE STEPS — THIS WEEK

### 1 **Pick one Class 11 batch**

No forms, no procurement — it's free to start during launch.

### 2 **Students sign up at [www.edupeak.org](http://www.edupeak.org)**

Any browser, any device — five minutes, no card.

### 3 **Run Basecamp · review with faculty**

Every student gets a CAMP profile; you get the batch's map.

## Partner tools — on our roadmap. Shape them with us.

Batch views, institute dashboards and cohort analytics are planned. Early-partner institutes get a say in what we build first — write to [hello@edupeak.org](mailto:hello@edupeak.org).

## Pilot it with one batch this term.

[www.edupeak.org](http://www.edupeak.org)

Have one Class 11 batch take Basecamp this week — free during launch — and see the readiness map your teachers have been missing. Questions: [hello@edupeak.org](mailto:hello@edupeak.org)
